

District of Port Edward

Clean, Neat & Green

January 31, 2014

To Whom It May Concern:

In 2012 the District was informed that School District #52 was going to close our old elementary school. The only way for the District to keep a school in our small community was for us to build a new smaller school and lease it to the School District. After public consultation and community support Council hired an Architect to design a school and prepare tender document.

Council chose to award the contract to Maloney Contractors Ltd. While we knew nothing about them with their tender package they supplied a number of references for us to check. I did check a few and had nothing but good comments.

Before I became the CAO for the District of Port Edward I spent 25 years in the construction business so I have a well-rounded background in how things should work.

The District was very fortunate that they hired Maloney Contractors to build our new school. In all my years of construction they are far and above any other firm I have worked with. Chris, Warren and Kathy went out of their way to make sure this project was built to the highest standards at the right price for our very small community.

You could not ask for a more competent, dedicated, professional group of people to work on your project. Needless to say the project was completed on time and on budget. The community, School District, Principal, teachers and most importantly the kids are extremely proud of the new school that Maloney Contractors built for us.

I strongly would recommend Maloney Contractors Ltd to build any project you may have. If you have any questions please contact me I would be happy to talk to you.

Yours truly,

Ron Bedard
Chief Administrative Officer

C: Mayor and Council
